

Student Theme Configuration

Student List Theme Configuration

eReserve Plus offers an easy way to theme the student resource list to match your institution colours and display your logo. The theme editor also includes options to customise and display a citation disclaimer and student help resources.

You can begin navigating to the Configure menu and selecting Student List Theme.

Please note that the Student List Theme menu option will only be available to Librarians that have the Site Manager role

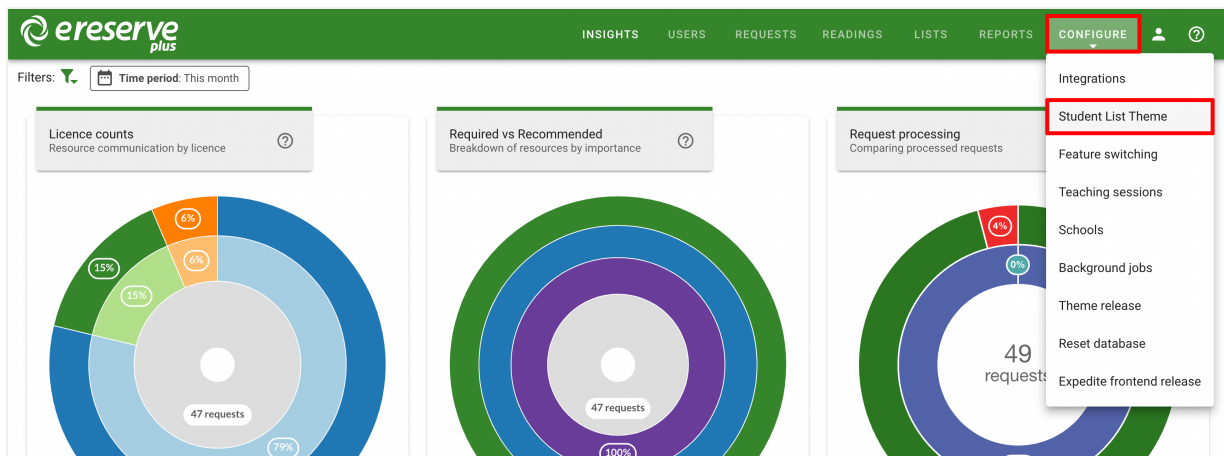

Figure 1: Student Theme Configuration - Menu

The Student List Theme editor will display an example, interactable student list where you can preview the changes as they are applied.

The screenshot shows the ereserve plus interface. At the top, there is a green header with the ereserve plus logo and search, list, and refresh icons. Below the header, the page title is 'THEME: Sample Course' with a sub-header 'Resources: Test List 3 resources'. The main content area is divided into 'RESOURCES' and 'DISCUSSIONS' tabs. Three resource cards are visible, each with a 'required' badge and a 'discuss' button. The first card is for a review of 'To Kill a Mockingbird' by Oxoby (2012). The second card is for 'The Art of The Lord of the Rings: A Defense of the Aesthetic' by Munro (2014). The third card is for 'Software Bug Ontology Supporting Semantic Bug Search on Peer-to-Peer Networks' by Tran & Le (2014). On the right side, there is a 'Theme' sidebar with 'Actions' (Reset, Revert, Publish) and 'Settings' (Colours, Institution logo, Citation disclaimer, Help menu).

Figure 2: Student Theme Configuration - Exemplist

The Theme sidebar on the right contains the settings for the student theme:

- Colours
- Institution logo
- Citation Disclaimer
- Help Menu

Figure 3: Student Theme Configuration - Theme Settings Sidebar

Any changes applied to the theme must be published before they are visible to users.

The actions section allows you to Reset, Revert or Publish changes to the theme:

- Reset - Restores the default eReserve theme and discards and changes to the theme. A confirmation popup will appear to indicate that the reverted changes will not be applied unless the reverted theme is published. You can make additional changes before publishing the theme.
- Revert - Undo any changes and restore to the last published theme. A popup will appear to confirm the revert and indicate that any current changes will be lost.
- Publish - Make any changes visible to all users. A popup will appear to confirm the changes.

Figure 6: Student Theme Configuration - Theme Colour Options

Selecting one of the colour options will display further details, including a description and examples of how the colour is applied.

Below the examples you will see a colour picker, with a Saturation/Lightness field and a Hue bar underneath. The circle on the left indicates the currently selected colour.

Primary

This colour is used for primary toolbar, badges, counts, etc

Examples

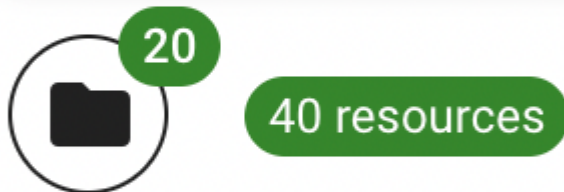

Figure 7: Student Theme Configuration - Colour Picker

Below the colour picker there is a field that shows the Hex colour code for the currently selected colour. You can enter a Hex colour code into this field to supply a specific colour.

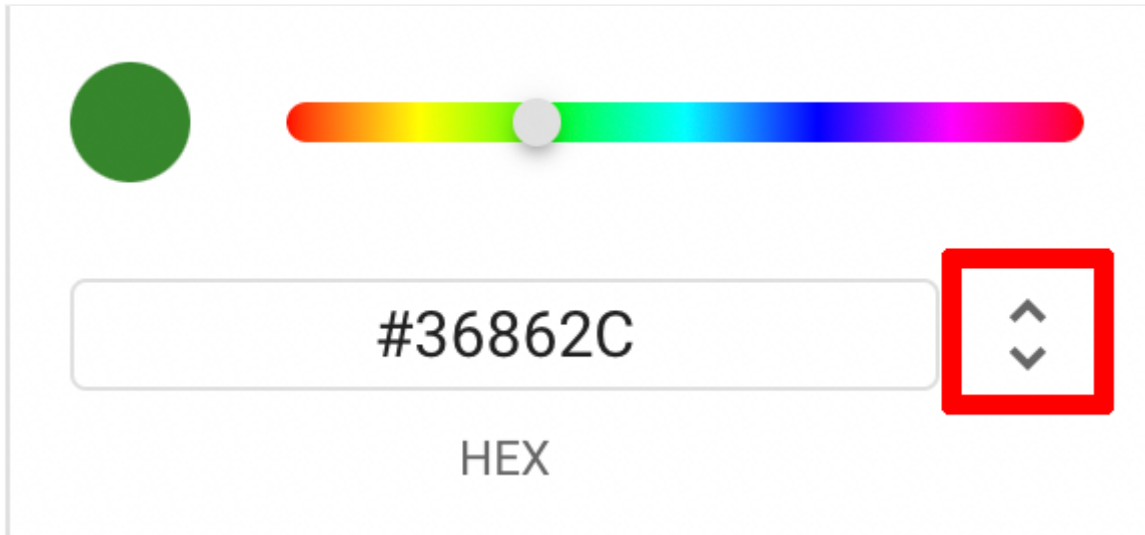

Figure 8: Student Theme Configuration - Specify Colour

The arrow buttons to the right can be used to change the type of colour value, cycling between RGB, HSL and Hex colour values.

When a colour is selected the example section, as well as the example student list, will change dynamically to show the new colour.

Any changes to the citation disclaimer must be published before they are visible to users.

Help Menu

eReserve includes help resources for students to navigate and use the features of the student list interface. These help resources can be disabled and re-ordered, and you can also add new custom help resources to the menu.

The default eReserve help resources are displayed within the student list interface, whereas custom help resources are linked to external help.
