

Configuring Schools

Summary: This will outline how to add and configure schools in eReserve Plus.

So that eReserve can generate meaningful audit and utilisation reports, eReserve Plus groups the Courses into schools. Adding the current schools into eReserve Plus allows the faculty and library staff to select the appropriate school membership for their Course.

School Creation

Admin staff with the role of either "Document Manager" or "Copyright Officer" will be able to create new Schools/Departments. Under the Configure drop-down menu, the Schools section will allow admin staff to create new schools and manage existing schools with ease.

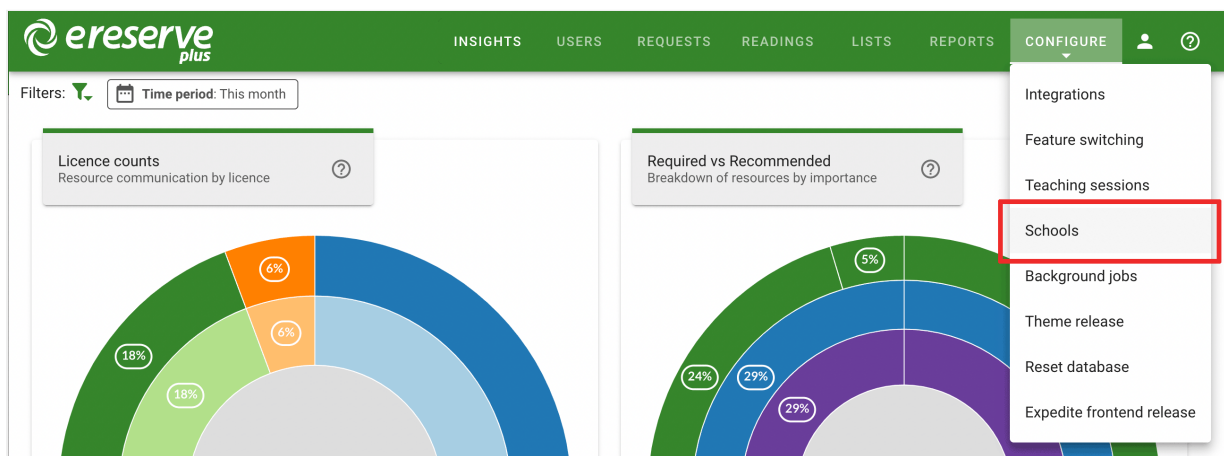

Figure 1: The Schools Configuration option

Once you have navigated to the schools interface, you can follow the steps below to create a new school.

1. Click the blue + button located on the top right.

Managing Schools

Edit an Existing School

Existing schools can be edited either by double clicking on any section of the row for a given school, or by clicking the vertical ellipsis button at the end of a row and selecting the Edit option. Using either of these methods will display a popup where the school name, center code and citation style can be updated.

The image shows a modal window titled "Editing school" with the subtitle "Editing of an existing school". The form contains three input fields: "Name" with the value "Faculty of Medicine and Health - School of Nursing and Midwifery", "Centre code" with the value "FMHSNM", and "Citation style" with a dropdown menu set to "Vancouver". At the bottom right, there are two buttons: "CANCEL" and "UPDATE".

Figure 4: The Editing School options

Clicking the Update button will save the new changes, and clicking Cancel button will close the popup without modifying the school.

Search

Schools can be filtered by using the search function which allows Library and Admin Staff to search for schools by Name, Centre Code, Citation Style, or across all fields by using the Any option.

When typing a search term into the field, a dropdown menu will appear with each of the field and filter type options.

Selecting a search field option with the 'contains' filter type, will return results that are a partial match for the search term. Selecting a search option with the 'is' filter type, will only return results that are an exact match for the search term.

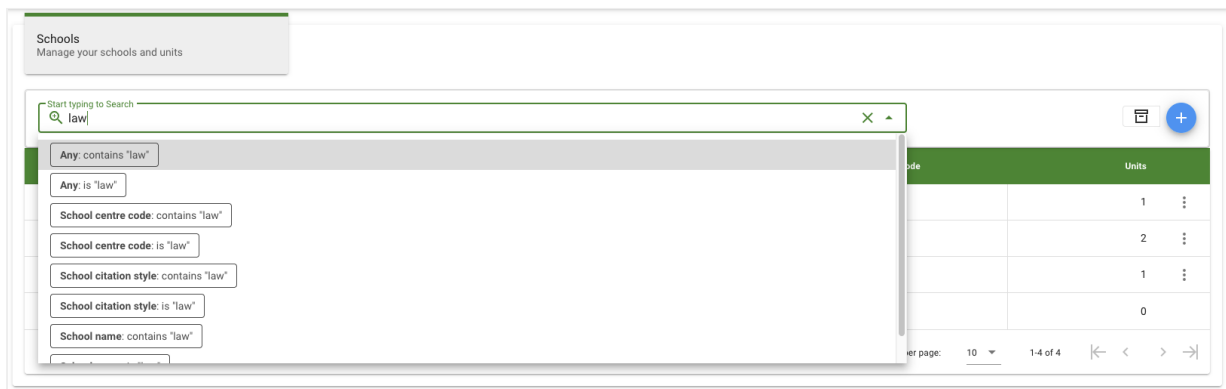

Figure 5: The search in Schools Management Page

After entering a search term, select a search option from the dropdown list to apply the specified filter and update the schools list.

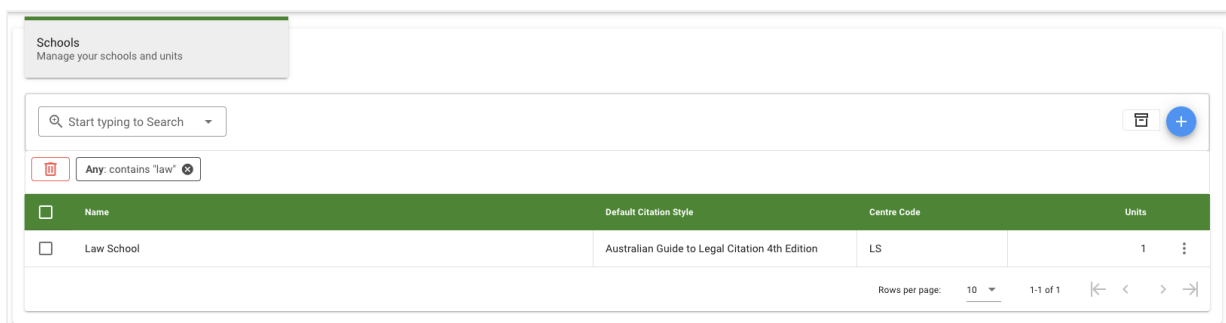

Figure 6: The Search filters above the Schools list

The selected filter appears above the schools list and indicates the search term and type of search. The filter can be removed by clicking the x on the filter label. All filters can be removed by clicking the red delete icon on the left.

Course Counts

The column located to the right hand side labelled Courses indicates the number of Courses currently assigned to each school.

Archiving

Archiving a school allows the removal of old schools from selection throughout eReserve Plus, in particular the settings for courses.

To archive a school, click the vertical ellipsis button at the far right of a row and select the Archive option from the menu. A green notification will appear at the top right indicating that school has been archived.

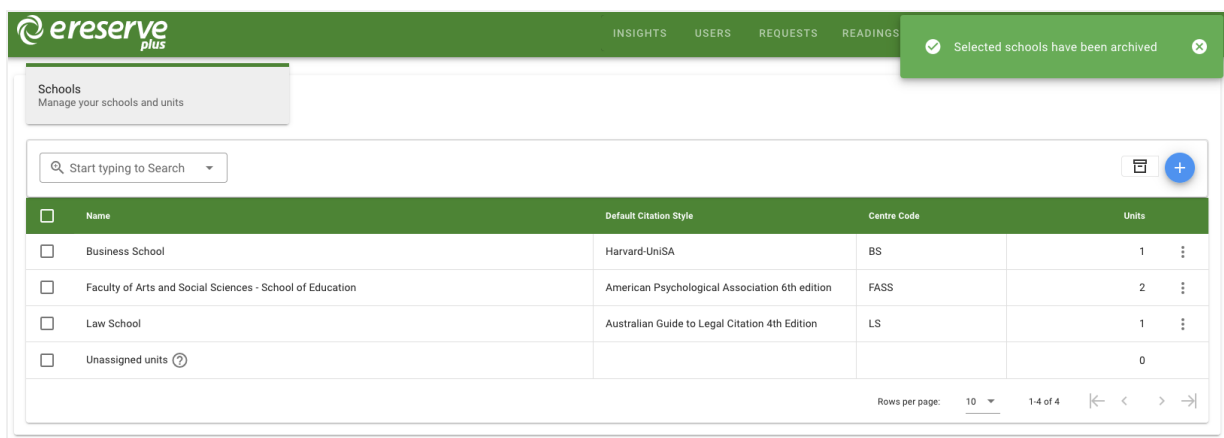

Figure 9: Archived a School

Multiple schools can be archived at once by selecting the checkbox next to each school, or all schools can be selected by clicking the checkbox on the toolbar. When one or more schools have been selected, an Archive button will appear above the top right of the schools list. Click the Archive button to archive the selected schools.
